PROFILE SUMMARY

Enthusiastic **Frontend Developer** with hands-on experience in building responsive and user-friendly applications using **React, JavaScript, TailwindCSS, and Redux**. Skilled in **API integration, responsive design, and version control (Git/GitHub)**. Quick learner with strong problem-solving skills, eager to contribute as a **Frontend Developer** in a dynamic software team.

SOFT SKILLS

Communication | Problem-Solving | Adaptability | Quick Learner

PROJECTS

Project 1: E-Commerce Website (React, TailwindCSS, Redux)

- **Built a fully responsive e-commerce app** with product listing, shopping cart, and checkout functionality

- **Implemented Redux** for optimized state management, ensuring smoother data flow and reduced unnecessary re-renders

- **Enhanced user experience** with real-time cart updates and intuitive navigation

  🔗 Live Demo | Source Code

Project 2: Weather App (React, OpenWeather API)

- Integrated **OpenWeather API** to fetch and display real-time weather data for multiple locations

- Built with **React** focusing on API integration, state handling, and responsive design for all devices

- Improved user accessibility with **search functionality** and dynamic weather updates.

  🔗 Live Demo | Source Code
